✓ Equal opportunity training programs

✓ State of the art facilities

✓ Continuing education programs

Building careers. Strengthening communities.

Every year, NECA-IBEW Apprenticeship Programs produce thousands of well-paid and highly skilled professionals specializing in electrical construction, audio and video communications, solar power generation, telecommunications, and more. Yet just as importantly, these programs offer a socially responsible approach to career building and education. We support the whole individual, families, and therefore, their communities with excellent compensation and benefits. Plus, our extensive outreach and strict anti-discrimination policies ensure diversity within the programs. Because everyone deserves the opportunity to prepare for a lifetime career with:

- » 8,000 hours of paid on-the-job training
- » 900 hours of fully funded college level classes
- » Full health coverage and pension benefits
- » State-of-the-art training centers
- » Continuing education in new and emerging technologies
- » Rewarding career opportunities

brighter futures begin here »

NECA-IBEW Electrical Apprenticeships

NECA-IBEW Electrical Apprenticeships don't just teach a trade, they create and provide a career for highly skilled craftsmen. These intensive three and five-year training programs include 4,800 and 8,000 hours, respectively, of paid on-the-job training, with 450 and 900 hours of classroom education. Classes are held in state-of-the-art facilities and taught by dedicated and experienced IBEW electricians. In addition to a paycheck, apprentices receive full health and pension benefits for themselves and their families. Plus, every graduate is state-certified. Yet just as importantly, every graduate brings NECA and IBEW's unparalleled standards of quality, professionalism, and safety to every job. And generate success wherever they go.

Over 60 years ago, the National Electrical Contractors Association (NECA) and the International Brotherhood of Electrical Workers (IBEW) joined forces to create what has become one of the largest apprentice programs of its kind. Not to mention, a model educational partnership between management and labor.

NECA and IBEW — Putting Energy Where It Matters

The National Electrical Contractors Association (NECA) is the management association for electrical contractors, representing thousands of employers who guarantee their installations and pride themselves in performing quality work on time and on budget. The International Brotherhood of Electrical Workers (IBEW) is the largest electrical union in the world. Together, they have developed national standards for selecting and training apprentices through the National Joint Electrical Apprenticeship Committee (NJATC). They also conduct continuing education for electrical workers. All in all, ensuring the most highly skilled, productive, and safety-conscious workforce possible.

The NECA-IBEW Apprenticeship Program is the unionized electrical contractor's best asset. The program ensures that when a customer calls for an electrician, the electrician will have at least five years of on-the-job and classroom training. It's this highly skilled workforce that is ensuring the future of our industry.

— Lewis Frain, Con. J Franke Electrical Owner

When I entered the Apprenticeship Program, doors started opening for me. You get paid on-the-job training while going to school. Where else can you do that?

— Alicia Romero, 4th year Alameda County JATC Electrical Apprentice

The past, present and future are what our Apprenticeship program is all about. I hope that sharing my past experience with present apprentices will help better prepare them for the future.

— Bob Wright, Alameda County JATC Electrical Instructor, 35-year IBEW Journeyman, Foreman, General Foreman and Superintendent

I graduated from Local 595's Apprenticeship Program, which provided a great foundation for my career in the electrical industry. I'm now responsible for large construction projects and we are very successful, thanks to IBEW trained electricians and apprentices.

— Earl Hampton, Foreman, Red Top Electric
